

L&B Provides Airport Noise Monitoring System & Noise Office Training in Bangkok

L&B just completed five days of initial training for the Noise Office staff from the Airports of Thailand Public Co. Ltd. (AOT) in the Noise Office for the new Suvarnabhumi International Airport (BKK) in Bangkok, Thailand. Participants were awarded a "Certificate of Achievement – Airport Noise Monitoring System & Noise Office Training" on the use of their new permanent airport noise monitoring system (ANMS) and on how to deal with the noise issues surrounding the new airport.

The new airport at BKK opened in late 2006 where Vince Mestre and Alan Hass of L&B have been providing numerous noise consultancy services to AOT for this project including:

- Preparation of overall system design
- Preparation of technical specifications
- Undertake noise monitoring terminal siting assessment
- Accompany AOT on technical tour of several other ANMS at airports in Europe and in Asia
- Providing tender and system installation support
- Undertaking system acceptance testing
- Setup and training of noise office staff with on-going support

L&B will continue to provide on-going support to the AOT Noise Office staff including additional training and consultative services as required.

Pictured right, Alan Hass and Christian Valdes of L&B pose with staff from the Airports of Thailand Public Co. Ltd. (AOT) in the Noise Office for the new Suvarnabhumi International Airport (BKK) in Bangkok, Thailand.
