INNOVATE | DEVELOP | EXPERIENCE | PROGRESS | IMPLEMENT | LEAD

INTERNSHIP AVAILABLE

Position Description:

Landrum & Brown is actively seeking qualified candidates for a **paid, full-time internship position** in our Chicago Office to begin in January 2017. Those interested in an internship must be graduates with, or enrolled in, a Bachelor or Master Degree program **with a specialization in aviation, architecture, engineering, environmental sciences, planning, management or related fields.**

Candidates must have a **passion** for aviation, understand working in a professional office environment, possess the aptitude to work several projects at once, be highly proficient at Microsoft Office Suite, and have a positive attitude.

There are three primary job responsibilities:

- (1) Environmental planning including sustainability planning, environmental assessments, environmental impact statements, NEPA regulations, noise management, Part 150 noise compatibility studies, noise monitoring, and noise modeling.
- (2) Master planning including planning studies, airfield design, building and development, GIS databases and mapping, and forecasting.
- (3) Facilities development including analyses regarding airport facilities and operations, terminal planning, financial planning, architecture, engineering, terminal development, landside/airside planning, and gate management/allocation.

To apply,

please e-mail a **PDF** of your resume and cover letter to:
